# The Cycle of Inquiry
## Work Sample Analysis

**Analyze data**
**Example**
**Target students:** 2 out of 4 students show care and respect towards each other and myself.

**Instructional Materials:** My materials don't necessarily reflect the concept of care.

**Systems and Routines:** I have a system where students can discuss each other's strengths, I'm not sure if it's working for my other 2 students.

**Observation Data:** My observation data revealed that I have consistency in this area.
